## ONGOING GROSS VIOLATIONS OF THE ANGLE DECREE AS ALLOWED BY THE OVERSEEING US DISTRICT COURT

This is a chart showing excess diversions by the Orland Project. It is not complete as to the years and the actual amounts shown, the actual amounts are still subject to a claim by the Project that it was entitled to more for certain parcels based on its rights in a set of 4 loopholes on p.143 of the Angle Decree, see http://www.mjbarkl.com/limits2.htm -- still, in no way can they justify more than 5 acre-feet per acre delivered because that's the maximum delivered volume awarded any upstream user. If OUWUA doesn't claim more than the 4.05 per acre the graph shows, then the amount allowed on the graph is the MAXIMUM they were allowed subject to reduction for certain types of less-thirsty crops. We are still searching for missing numbers from the other years.

Data derived from Reclamation and OUWUA reports, see http://www.mjbarkl.com/limits2.htm

	Project	Diversion	Actual	Amoun	t Over		Project	Diversion	Actual	Amoun	t Over	1
